Agility Intelligence Product Highlights

Agility Intelligence by Wisys brings AI-powered automation and insight into everyday ERP workflows - helping teams analyze data, interpret documents, optimize fulfillment, and schedule production with less manual effort.

AI Agent

Ask questions, analyze files, generate reports, export data, and complete ERP actions from a conversation.

Faster decisions, instant insights, and less dependence on custom report building.

AI Interpreter

Read emails, PDFs, and attachments, then convert unstructured data into ERP-ready transactions.

Labor savings, faster order processing, and fewer manual data-entry errors.

AI Packing

Packing intelligence recommends optimal box selection and configurations based on order details.

Lower freight and packaging costs, faster workflows, and more consistent fulfillment.

AI Production Scheduler

Optimize schedules as demand, materials, and capacity change.

More predictable schedules, fewer firefights, and improved operational efficiency.
