WISYS

PACKAGES

2025-2026

AGILITY ESSENTIALS

The foundation for efficient warehouse operations — includes all the core SAP Business One transactions and tools to streamline workflows, such as:

- Goods Receipt, Put Away, Transfers, and Sales Order Delivery
- Batch and Bin management
- Label design and printing
- Production tracking and document management
- Customization via Agility Design Studio

Perfect for businesses ready to digitize and optimize warehouse processes.

New for 2025 – WiSys Agility Intelligence AI Suite of Products

AGILITY ENTERPRISE

Take control of complex fulfillment and pallet operations with:

- Advanced pallet management (containers, cartons, license plates)
- Multi-carton and shipment-building capabilities
- EDI and LTL data support for seamless logistics

Ideal for growing businesses that need more automation and flexibility.

New for 2025 – WiSys Agility Intelligence AI Suite of Products

AGILITY ENTERPRISE + SHIPPING

Add advanced multi-carrier shipping with full integration to UPS, FedEx, and USPS. Includes:

- Mobile tools for staging, packing, and shipping
- Support for US-based international shipments

The complete warehouse-to-doorstep solution for fast, accurate order fulfillment.

New for 2025 – WiSys Agility Intelligence AI Suite of Products

DESKTOP[AI] DESIGN PALLET AI PRO SCHEDULER FULFILLMENT[AI] SHIPPING
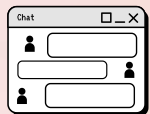

Product Summary

Agility Desktop from WiSys is a flexible workspace for SAP Business One that puts the data you need right at your fingertips. Run it inside or outside of SAP B1 to view, analyze, and act on real-time business information. With customizable grids, dashboards, and alerts, you can monitor sales, purchasing, production, and inventory from a single interface. Drill into details instantly, set role-based access, and use Agility Desktop as the foundation for advanced supply chain, composite transactions, and business intelligence tools —all tailored to your workflows.

Key Features

- Access your workspace anywhere—run inside or outside SAP Business One.

- Stay proactive with custom alerts and real-time data views.

- View and manage sales, purchasing, production, and inventory in one place.

- Drill down instantly for deeper analysis and decision-making.

- Build a foundation for advanced SCM, composite transactions, and BI tools.
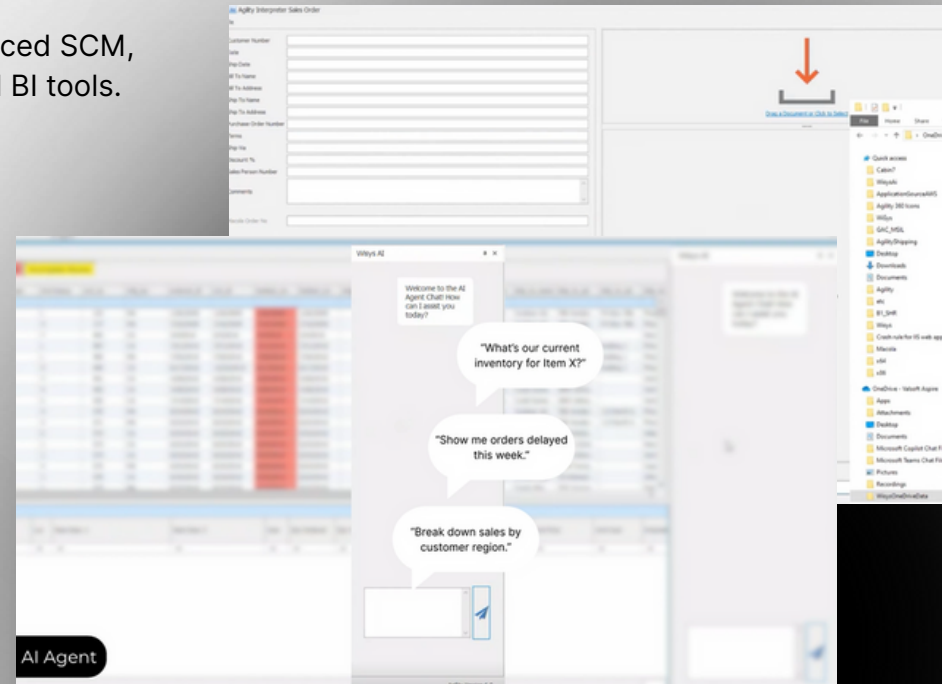

Ideal Use Cases

- Businesses needing a central dashboard for multiple SAP B1 functions.

- Teams requiring quick drill-down capabilities for operational decision-making.

- Companies preparing to implement advanced supply chain or BI solutions.

AI

AI AGENT makes your ERP as easy to use as Google or Siri—ask questions and get instant insights.

AI INTERPRETER automates order entry with smart drag-and-drop efficiency. Reading orders and feeding your ERP instantly.

DESKTOP[AI]　**DESIGN**　**PALLET**　**AI PRO SCHEDULER**　**FULFILLMENT**[AI]　**SHIPPING**
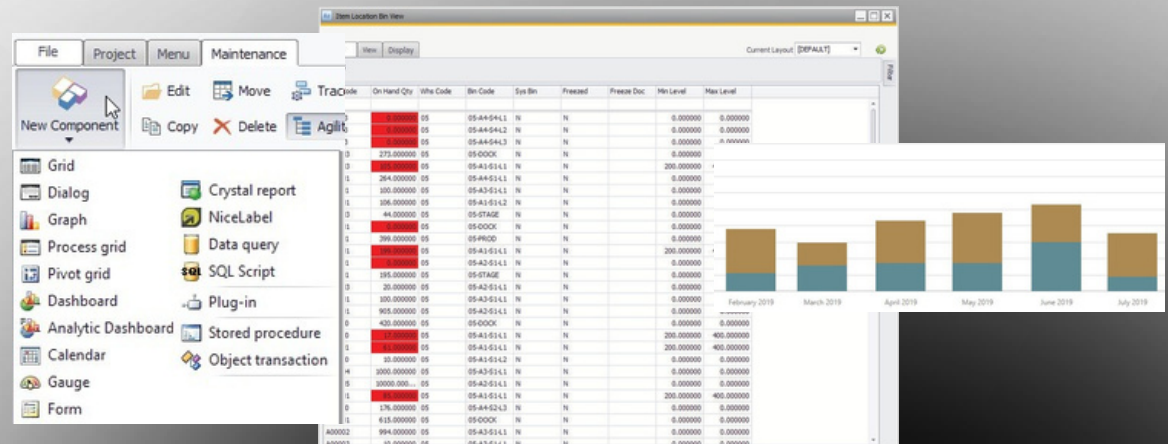

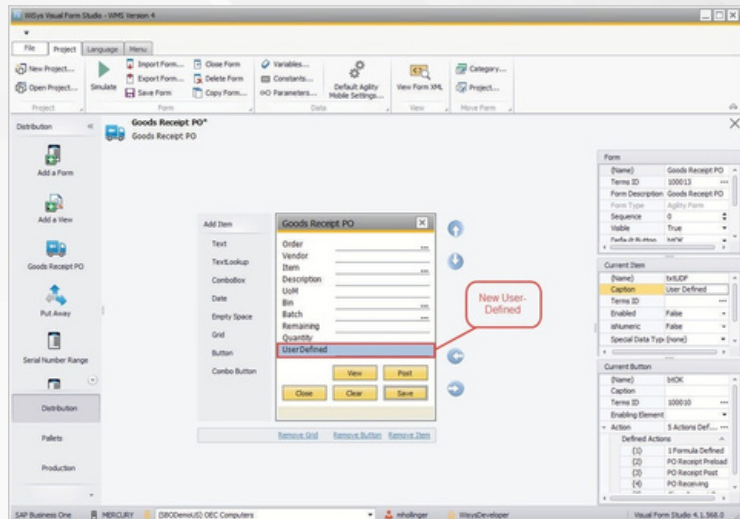

Product Summary

Agility Design from WiSys gives SAP Business One users the tools to create tailored workflows, dashboards, reports, and mobile forms—without writing a single line of code. Built on the Agility Adaptable Framework, it enables businesses to adapt ERP functionality to their processes, not the other way around. With Agility Design Studio for desktop features, and Agility Form Studio for mobile devices, you can design, tailor, and refine solutions that boost efficiency, compliance, and ROI—all while maintaining a consistent, user-friendly interface.

Key Features

- Build custom ERP workflows without modifying source code.

- Design interactive dashboards and analytics using drag-and-drop tools.

- Create and modify mobile data collection forms to match your processes.

- Chain multiple SAP B1 transactions for automated, efficient workflows.

- Enhance compliance and traceability with integrated reporting and label printing.

Ideal Use Cases

- Businesses with unique operational workflows that standard ERP setups can't handle.

- SAP Business One users needing mobile form customization for warehouse or production.

- Companies looking to link data analysis directly to ERP transactions for faster action.

WISYS

DESKTOP[AI]   **DESIGN**   **PALLET**   **AI PRO SCHEDULER**   **FULFILLMENT**[AI]   **SHIPPING**
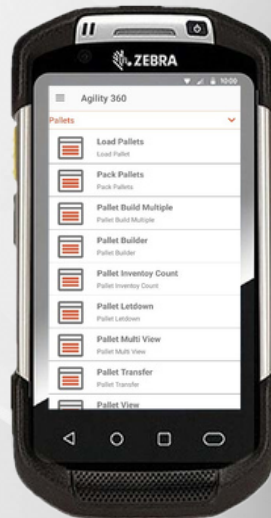

Product Summary

Agility Pallet Management streamlines pallet handling within SAP Business One, giving you faster, more accurate warehouse transactions. By assigning unique pallet license plates (LPNs) and using mobile barcode scanning, it provides full traceability from production to shipping. Whether building pallets on-the-fly, transferring between locations, or loading directly into shipments, Agility Pallets improves efficiency, reduces errors, and enhances inventory control. With integrated handheld and desktop tools, businesses can optimize pallet storage, movement, and fulfillment—ensuring smoother warehouse logistics and stronger customer satisfaction.

Key Features

- Pallet Builder & Transfers – Create, move, and consolidate pallets with full traceability.

- Barcode-Driven Tracking – Scan pallet LPNs for fast, accurate inventory movements.

- Pallet Letdown & Replenishment – Simplify order fulfillment by replenishing pick bins.

- Production & Receiving Integration – Build pallets during receiving or production processes.

- Desktop & Mobile Support – Real-time transactions for receiving, transfers, shipping, and reporting.

Ideal Use Cases

- Companies with complex multi-carrier or international shipping needs.

- Businesses requiring tailored packaging workflows for diverse products.

- Operations seeking to link WMS, EDI, and shipping in one streamlined process.

DESKTOP[AI]   **DESIGN**   **PALLET**   **AI PRO SCHEDULER**   **FULFILLMENT**[AI]   **SHIPPING**
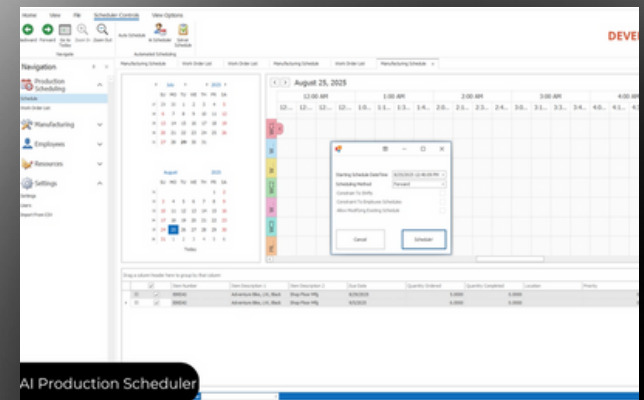

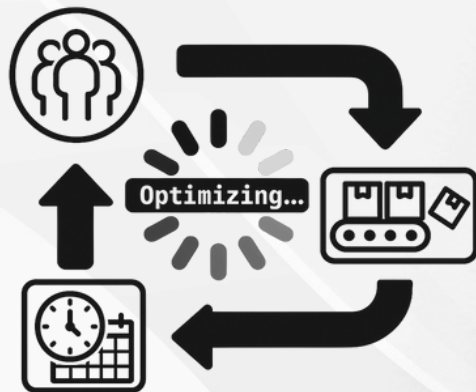

Product Summary

AI Fusion Production Scheduling from Wisys is your always-on master planner that continuously optimizes manufacturing schedules. Unlike static spreadsheets, this AI-driven tool analyzes every factor—priorities, due dates, machines, employees, and materials—to automatically build the most efficient plan. When priorities shift, machines break, or new orders arrive, the schedule adapts instantly. With a user-friendly drag-and-drop editor, you can easily refine plans while the AI maximizes throughput and minimizes downtime. The result: smarter schedules, faster delivery, and a production process that runs as fast as your business demands.

Key Features

- Dynamic Scheduling – AI instantly adapts plans to real-world changes in priorities, orders, or machine availability.

- Maximized Throughput – Optimizes resources, employees, and work centers for higher efficiency.

- Proactive Planning – Transforms scheduling from reactive firefighting to predictive optimization.

- User-Friendly Controls – Drag-and-drop editor allows manual adjustments when needed.

- Real-Time ERP Integration – Keeps your ERP updated with live scheduling data.

Ideal Use Cases

- Manufacturers juggling frequent order changes and production constraints.

- Businesses struggling with delays from static or manual scheduling.

- Operations seeking to improve on-time delivery, throughput, and resource utilization.

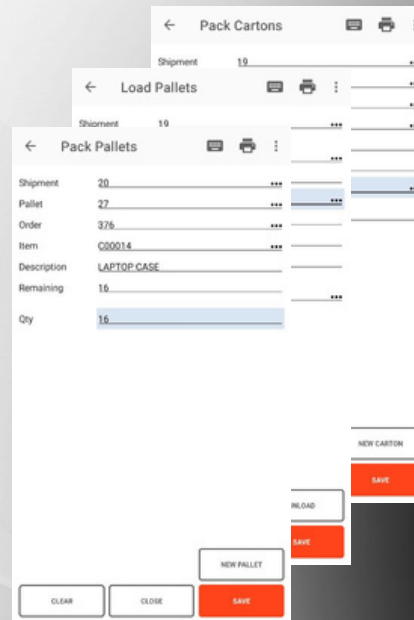

AI Production Scheduler

Product Summary

Agility Fulfillment is WiSys' SAP Business One shipping logistics solution designed to streamline, automate, and customize your most complex fulfillment processes. From paperless picking to real-time packing and pallet management, it ensures faster, more accurate shipments while maintaining top-tier customer service. Whether you're shipping small parcels, full pallets, or large freight (TL/LTL), Agility Fulfillment integrates with carriers, WMS, and EDI for seamless operations. With tailored packing workflows, automated documentation, and mobile device compatibility, you can optimize every step—reducing errors, shortening turnaround times, and delivering on-time, every time.

AI

AI PACKING is a digital packing expert. Analyzing products, sizes, and quantities and mapping the most efficient solution.
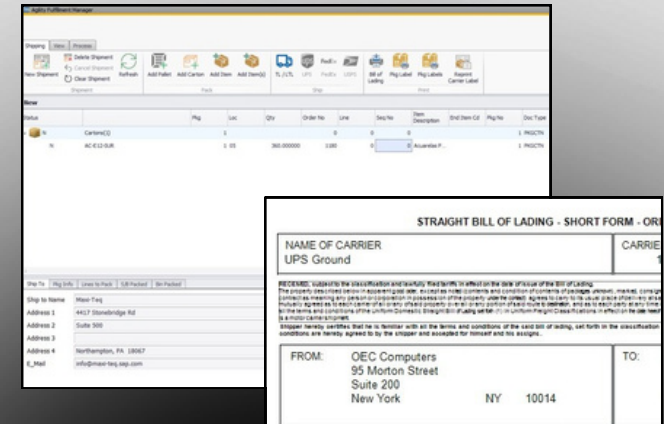

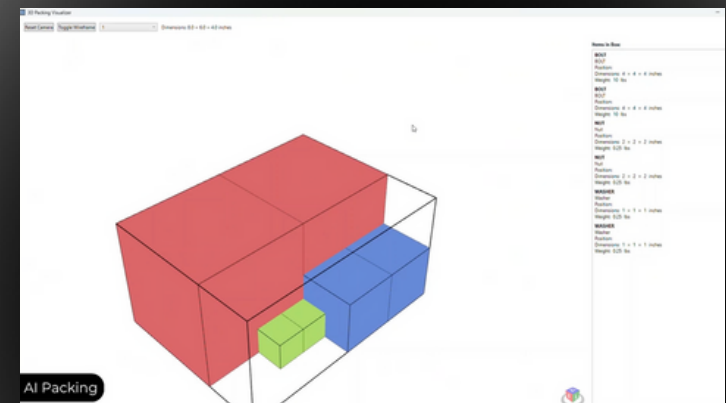

Key Features

- Paperless & Directed Picking to reduce errors and speed order selection.

- Flexible Packaging Definitions for cartons, pallets, drums, and more.

- Carrier Integration with UPS, FedEx, USPS (domestic & international).

- Automated Documentation including BOL, packing lists, and UCC-128 labels.

- Real-Time SAP B1 Updates for accurate inventory and shipment tracking.

Ideal Use Cases

- Companies with complex multi-carrier or international shipping needs.

- Businesses requiring tailored packaging workflows for diverse products.

- Operations seeking to link WMS, EDI, and shipping in one streamlined process.

WISYS

DESKTOP[AI]   DESIGN   PALLET   AI PRO SCHEDULER   FULFILLMENT[AI]   **SHIPPING**

Product Summary

Agility Shipping is Wisys' integrated pick, pack, and ship solution for SAP Business One. It eliminates shipping errors, delays, and chargebacks by giving you real-time accuracy and full visibility across the shipping process. With built-in multi-carrier support for UPS, FedEx, and USPS, you can streamline label creation, packing, and shipment tracking from desktop or mobile devices. Whether shipping from a workstation or directly in the aisle, Agility Shipping ensures faster deliveries, reduces manual steps, and keeps SAP Business One updated automatically.

Key Features

- End-to-End Integration – Pick, pack, and ship in one seamless SAP B1 workflow.

- Multi-Carrier Support – Direct integrations with UPS, FedEx, and USPS.

- Flexible Packing – Single-pack, multi-pack, or in-aisle shipping.

- Mobile & Desktop Options – Print labels and process shipments anywhere.

- Real-Time Updates – Automatic tracking numbers, delivery notes, and packing records in SAP B1.

Ideal Use Cases

- Businesses frustrated by shipping mistakes or chargebacks.

- Teams needing real-time shipment tracking and visibility.

- Warehouses looking to consolidate pick, pack, and ship into one solution.
