

# Production Labor Reporting with Real-Time Visibility

## ERP-Connected Labor and Machine Time Tracking for Manufacturers

Wisys helps production teams capture labor and machine time from the floor, monitor active jobs in real time, reconcile completed work, and post accurate hours back to the ERP - without paper notes, delayed updates, or disconnected spreadsheets.

**Mobile time capture**  
start, pause, stop, report

**Real-time visibility**  
active, paused, completed

**ERP-connected posting**  
labor + machine hours

# Modernize Production Labor Tracking

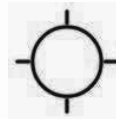

Manual labor reporting slows production teams and weakens visibility. Agility Production Labor Reporting gives workers a fast way to capture time and gives supervisors one connected view for reviewing and posting production hours.

## Mobile Time Capture

Use Agility 360/Mobile to start, pause, stop, and report job time from the production floor.

**Capture time as work happens.**

## Labor and Machine Resources

Record employee labor and optional machine resources against the right production order and stage.

**Improve production costing accuracy.**

## Real-Time Supervisor View

Monitor active, paused, and completed entries by employee, status, order, elapsed time, and stage.

**Know what is happening right now.**

## Production Reconciliation

Review production orders, planned quantities, completed quantities, and reported hours before posting.

**Post cleaner data back to the ERP.**

**Ready to connect the floor to your ERP?**

See how Wisys helps teams capture time, monitor production, and post accurate hours.
