

WISYS FOR MANUFACTURERS

Real-Time Control for Manufacturing

Warehouse Intelligence Built Inside Your ERP

Wisys helps manufacturers connect inventory, warehouse activity, production workflows, and shipping execution inside the ERP they already rely on - without middleware, disconnected tools, or starting over.

99%+

inventory + shipping accuracy

30%

productivity gains possible

20+

years of ERP-connected expertise

Simplify Manufacturing Warehouse Complexity

Manufacturing operations move fast. Wisys gives teams real-time inventory visibility, mobile execution, production-connected workflows, and practical AI so materials, orders, and schedules stay aligned.

Inventory Control

Track raw materials, WIP, and finished goods in real time.

More trust in inventory data and fewer production delays.

Production Workflow Fit

Connect warehouse moves, production orders, material availability, and job status.

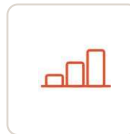

Warehouse execution and production planning stay aligned.

Mobile Data Collection

Capture receiving, picking, counting, and production activity with scanning.

Less paper, fewer manual entries, and cleaner ERP data.

AI + Automation Inside the ERP

Use AI for ERP queries, documents, packing, shipping, and scheduling.

Modernization without starting over or adding complexity.

Ready for more control with less chaos?

See how Wisys helps manufacturers modernize warehouse and production workflows inside the ERP.
